

## Year 6

### PE Homework

**Task:** to design a small-sided team game

As part of our PE unit involving striking and fielding skills next half-term, you will need to design a small-sided game that you can teach to a small group of children during one of your PE lessons. The game will need to include the development of different skills, for example: striking a ball, sending and receiving a ball, throwing and catching accurately.

Each activity should take approximately 10 minutes to play and involve 6-8 players.

Your game must use equipment that is available at school and must not involve contact with other players.

You will need to record the instructions and rules for your game on a piece of A4 paper. This may include diagrams, flow charts, photographs, pictures, etc.

You will also need to design an evaluation section for feedback from your peers after they have played your game.

**You will need to bring your completed homework into school  
by Thursday 21<sup>st</sup> May.**
