MY TEACHING STYLE

Supportive • Patient • Creative • Structured • Encouraging

Helping young artists discover and develop their drawing skills, build confidence and explore their creativity. They learn to see and think differently, solve problems and imagine new possibilities.

Creativity is where new ideas begin and every invention starts with imagination. Nurturing creativity helps young people build the confidence to explore ideas, think independently and develop new ways of seeing the world.

Drawing is a fundamental creative skill that can be learned and strengthened through observation, practice, patience and guidance.
